

STATION UPDATES

Inlet Centre Station

Site context plan for completed Inlet Centre Station

Inlet Centre Station is located at the intersection of loco Road and Barnet Highway, on the north side of the CP Rail corridor. The station will serve high-density residential developments, including Suter Brook Village, Newport Village and Klahanie, as well as the shops, businesses and civic centre in the area.

Inlet Centre Station has two entrances, one on the west side and the other on the east side of the intersection, to allow passengers convenient, safe access from each side of Barnet Highway without having to cross the highway. In response to the community's desire to have a station that is not elevated, the station is designed to blend into the surrounding area with station houses on both sides of the roadway. The station platform can also be used to cross Barnet Highway. People with an active compass card can tap in at the station, use the platform to cross Barnet, and tap out on the other side without being charged, provided they tap out within 21 minutes.

Inlet Centre Station incorporates spacious glass entrances creating an open, well-lit and secure station. Landscaped plaza areas will lead to the station entrances. At the west station house, the design features a two-storey glass wall that will bring natural light to the station platform while allowing passengers to see the Suter Brook Creek wetland to the west.

Outside the station, the existing bus stops on Ioco Road and Barnet Highway will be connected by sidewalks to the station entrances. There will be a HandyDART stop at the east station entrance along with passenger drop-off and pick-up spaces.

What is the Evergreen Line Project?

The Evergreen Line Project is an 11-kilometre extension to the existing SkyTrain system in Metro Vancouver. It will be a fast, frequent and convenient SkyTrain service, connecting Coquitlam City Centre through Port Moody to Lougheed Town Centre in approximately 15 minutes. It will connect without transfer to the current SkyTrain network at Lougheed Town Centre Station and will integrate with regional bus and West Coast Express networks. When the line opens, Metro Vancouver's SkyTrain system will become the longest fully automated rapid transit system in the world.
